Fight Back Pittsburgh E-board Report
July 22 2015**

Fight Back Pittsburgh has spent the past month getting organized with a new executive board after nominations last month as well as continued to participate in the Paid Sick Days Campaign and standing with the Steelworkers bargaining contracts at ATI and at US Steel.

The new e-board has been working on establishing a more formal and strategic communications operation within the Action Network and social media. Along with this, the board has been brainstorming possibilities for engaging more of our membership in our Community and Fight Back @ Work Committees and our Women's Caucus. We are planning an e-board retreat for the end of August to discuss both long and short term planning and are in the beginning of discussions on planning a labor day fundraiser.

Our work with the Paid Sick Days campaign has been geared towards communications and reaching out to our members, but we attended the legislative introduction as well as the post-agenda hearing and the committee vote yesterday. Since the committee vote didn't happen, we are gearing up for a public hearing after the ATI rally on the 30th of July at 1pm.

Fight Back Pittsburgh is eager to continue our work on various campaigns including supporting the Steelworkers bargaining contracts right now. We will be out on the 30th and want to offer solidarity and support for all workers fighting for fair wages, hours, and safe conditions in the workplace. Stay tuned for upcoming actions and events!
