## **Health and Safety Committee Sept 2015**

The Health and Safety Committee did not meet this month. However, the International has greatly improved the usability of wheelchair ramp by removing the thresholds from the wheelchair ramp and used concrete to create a gradual rise.

The committee still has not received the information that we have requested from the International on the ADA accessibility study nor on the print shop walk through by Health and Safety.

The 10<sup>th</sup> floor restrooms have yet to be improved for ambulatory accessibility.

We are still planning to have a lobby display on chemicals and fragrances found in everyday products that affect people's health.
